DETAILED ACTION

Response to Amendment

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 10 March 2005 has been entered.

Information Disclosure Statement

2. The Information Disclosure Statement respectfully submitted on 9 March 2005 has been considered by the Examiner. The Information Disclosure Statement has no negative affect on the patentability of this application. Therefore, claims 1 and 20-36 are in condition for allowance.

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance: **Claims 1 and 20- 36 are allowed.**

4. The present invention is directed to a user authentication card system for execution of individual authentication based on information indicative of biological individuality data such as a fingerprint or voiceprint stored in portions between an authentication card and a certificate authority. Each independent claim identifies the uniquely distinct features "**wherein at least one certification authority dividedly**

records the remaining part of the biological individuality data obtained at the registration station but not recorded in the user authentication card, and the at least one certification authority compares the biological individuality data of the user input at the authentication access terminal with the part of the biological individuality data stored in the certification authority ”. The closest prior art, Dulude et al. (US Patent No. 6,310,966) discloses an authentication system where the entire biological individuality data used to authenticate a user is stored in either a biometric database or a smart card. Dulude does not anticipate or render obvious an authentication system where portions of the biological individuality data for a user are stored in both a biometric database and a smart card.

5. Therefore, **claims 1,20, and 29** and the respective **dependent claims 21-28 and 30-36** are in condition for allowance.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
